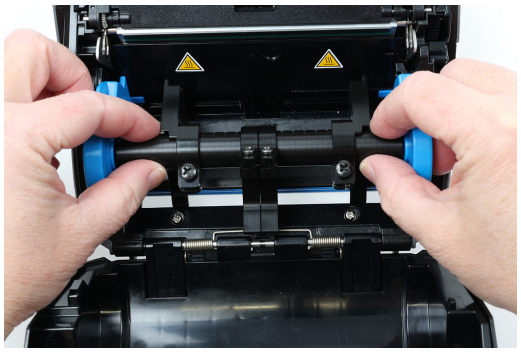
TELEPÍTÉS

Kiegészítők



Please read all of the instructions and look at the pictures before attaching the holder.

1. Start by removing the roller plates from the printer, as shown in the illustration.

2. Loosen the screws slightly so that the guide arms can be angled. Pull the attachment points apart and place the label guide inside the printer. Rotate the label guide downward until the locking arms click into the designated slot. Make sure both arms have clicked in and are securely seated.

3. Adjust the guide rails so that the label passes through the slots in the label guide, position the two middle guide rails to ensure even pressure across the label roll. Then tighten all the screws.

4. The label guide is now properly installed.
