## Extra erős ProClip

Please read all of the instructions and look at the pictures before attaching the ProClip mount. It is important to install the mount first: any device holder/equipment is to be attached after the mount is in place. This mount consists of three parts: a mounting plate, an attaching part and a Pedestal Mount.

1. Press the thin end of the enclosed gap opener into the gap between the dashboard and the panel surrounding the USB outlet, to widen the gap. Press the angled edge of the attaching part into the gap below the gap opener. Pull out the gap opener.

2. Press the thin end of the enclosed gap opener into the gap between the dashboard and the panel surrounding the USB outlet, on the cabin side of the panel. Press the angled edge on the mounting plate into the gap below the gap opener. Pull out the gap opener. Position the attaching part outside of the mounting plate. Attach the parts together with the enclosed screws.

3. Place the included Pedestal Mount over the holes in the mount and attach it with the enclosed screws.

4. The ProClip mount is in place.
