Mount - Rögzítő

Please read all of the instructions and look at the pictures before attaching the mount.

1. Lay the printer back side up on the table. Remove the two parked screws. Hook the notch on the mount into the small hole in the printer. Press the mount flat onto the printer so the other end hooks around the printer and the holes match. Attach the mount onto the printer with the two enclosed screws.

2. Put the charging box in place. Place the cable tie in the slot and fasten the charging box and cables. It is important not to position the charging box too close to the AMPS holes.

3. For installation onto a pedestal mount: Attach the pedestal mount top plate onto the mount. Attach the printer in place onto the pedestal mount.

4. The mount is in place, with a printer in place.
