Screw upgrade kit

Please read these instructions carefully and review all illustrations before using the stand. It is important that all adjustments are made to fit the device being used. Always hold the supplied Allen wrench by its short end.

1. This replacement kit is used to replace the hand-tightening locking wheels with Allen screws.

2. Unscrew the locking wheel from the support and lift the support off. Remove the locking wheel from the support.

3. Insert the Allen screw into the support. Put the support back in place and position it as desired. Tighten the screw using the Allen wrench, holding it by its short end.

4. The charging cradle is now ready for use.
