POS Stand

Please read through all the installation instructions and study the illustrations carefully. Plan the assembly so that the steps are carried out in the correct order.

1. Place the base plate in the desired position. Position the side panels against the base plate and press them into the grooves. Place the front panel on top of the side panels and press it down into the grooves on both sides. Repeat the same procedure with the rear panel.

2. Position the top plate behind the stand and slide it into the grooves.

3. Depending on the intended use, attach the required holder, equipment or device to the top plate before sliding it into place. Route the cables as required. Slide the top plate into place and secure it using the supplied screws at the back of the stand.

4. The stand is now fully assembled.
