ProClip

Please read all of the instructions and look at the pictures before attaching the ProClip mount. It is important to install the mount first: any device holder/equipment is to be attached after the mount is in place. This mount consists of two parts: a faceplate and a mount.

1. Press the thin end of the included gap openers into the gap along the right side of the floor console, to widen the gap. Position one just ahead of the bend and one aligned with the back of the front cup holder, as shown in the picture. Press the upper edge of the mount into the gap between the gap openers. Align the back edge of the mount with the center on the front cup holder. Pull out the gap openers.

2. Press down on the top of the mount. Press the lower part of the mount toward the console sidewalland hook the bottom edge under the floor console side wall.

3. Place the included locking washer into the recess on top of the mount. Place the faceplate onto the mount. Adjust the faceplate into the desired angle. The faceplate may be installed for use by the driver or the passenger. Attach the faceplate to the mount with the included screw.

4. The ProClip mount is in place.
